

## The future is built on the present

Welcome to the first census in the Faroe Islands in 34 years.

All households and everyone residing in the country will complete this questionnaire.

Such a comprehensive survey will yield statistical data that will offer insight into the nature of today's Faroese community. This information can be used in a variety of ways. For example, policy or administrative decisions can be based on concrete knowledge of specific circumstances within the community. Moreover, the data can be used for educational and research purposes and by different interest groups.

The information provided in answering this questionnaire will only be used to generate statistics administered by Statistics Faroe Islands. Everyone in the Faroe Islands has the same right of access to these statistics. No public authority has any access to the information provided by any specific resident, household or dwelling.

The census is conducted pursuant to Parliamentary Act No. 115, dated 14 May 2011.

Thank you!

1 November 2011

Heini Hátún, Director

## Who completes the questionnaire?
